

## **EVERY DROP COUNTS**

100% Recycle – Zero Intake & Zero Discharge.

### **NARRATIVE**

UNP Environmental Corporation owned by professional engineering team having wide experience of providing energy efficient customized process solution to wide range of industries. The organization has mastered the art of designing, engineering, execution and commissioning of low temperature evaporation system.

### **PRODUCTS**

UNP product range provides complete solution of waste water purification and handling of solid waste.

### **STRENGTH**

- Experienced team for innovative turnkey customized solution
- Adequate infrastructure for trial & testing before dispatching to customer
- Low-cost manufacturing facility with highest workmanship
- Remote monitoring and controlling is provided for efficient operation

### **Recovery and recycling up to 99% of effluent water.**

Mechanical VAPOUR Compression technology is truly -

- ◆ Energy Saving
- ◆ Water Saving
- ◆ Environmentally Sound
- ◆ Helps With Resource Recycling

It upgrades low pressure waste vapour to  
high pressure useful steam.

**UNP's Mechanical Vapour Recompression (MVR)  
vaporization technology provides customized solutions  
to meet specific evaporation needs of customers.**
